Ergonomics

A long-lasting work in an inconvenient position may lead to occupational diseases (muscle and joint disorders). This is why desks in ALFA system have the possibility of height adjustment, which gives a chance to adjust the workplace to the worker's height and minimize the risk of spinal disorders.

reliability

prestige

Endurance and durability

MDD's furniture is produced from materials of proved quality and elements delivered by renowned suppliers from all over the world.

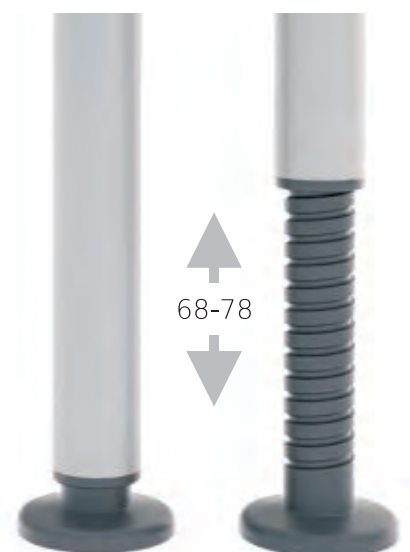

Safe material

All materials used for production have the hygienic certificates confirming their nontoxicity.

Simple, lightweight and modern construction designed according to the world's current trends of industrial design. 28 mm thick desktops available in various shapes. Desks, extensions, conference tables available in a wide range of colours. Continuous height adjustability within 68-78 cm (screwable foot)

The desktop's geometry allows to place the screen in a safe distance from the eyes (70-80 cm).

Tidiness and comfort

To set optimum work conditions arrange supplementary furniture, panels and partitions.

partitions

screens

An economical way of dividing workspace

space always open

Safe construction

Our designers pay special attention to furniture's construction stability and care for its conformity with safety norms of the European Union countries. Cabinets and bookshelves are 43 cm deep.

The desktops boards display a special office surface quality which diffuses light and is smooth enough to facilitate writing.
28 mm thick desktop is rigid enough to be used with four independent legs.

partitions cloth panels hanging frames

Partitions and screens divide the space optically and reduce noise.

Coated with cloth, partitions (40 mm thick) are connected at the right angle. You can place on them shutter cabinets, shelves, as well as hanging frames. Cable channels have been designed in the base.

division of labor

Acoustics

Noise in workplace is both tiring and lowers effectiveness. This is why we recommend the use of partition walls, panels and cloth-covered screens that reduce the sound level by approximately 30%.
