Wall panels

Puzzle

Design **Paul & Kate Brooks**

Puzzle is a range of acoustic wall panels inspired by the classic jig-saw shape. The design offers a series of five puzzle pieces. By combining these elements you can

build infinite tableau structures or link random pieces in free style. Stylish, fun and reassuringly familiar.

A - Fabric
B - Basotect® melamine foam
C - HDF board

● - 55mm Puzzle panels
 $\alpha_w = 1.00$ (class **A**)

The core of Puzzle panels is made of melamine foam, which has outstanding sound absorbing properties. Puzzle panels are thoroughly sewn and upholstered in fabric of your choice.

Puzzle panels are certified according to EN ISO 354 as class A sound absorbers, absorbing 100% of unwanted noise. They can be used on walls of reception halls, restaurants, canteens or any other spaces needing reduction of reverberation time.
